WINE ON TAP

At Three Blue Ducks, we are always looking at ways to reduce our impact on the environment while still maintaining the quality offering that we pride ourselves on.

"Wine on tap" is something that we'd seen done really well overseas and wanted to give it a go - now we have a 56 tap system, pouring all of our beer, cider, sparkling water and most of our wines. With the use of this system, plus making our own soft drinks enables us to save around 9,000 bottles per month; the energy and the resources that go into their production, the energy used to transport them here and then to dispose of them, we think that's worth the extra work that goes into doing things this way.

As for the wine, it seems to love it. By transporting the wine in bulk containers, then transferring it into our stainless steel kegs for service the wine sees no oxygen until it hits your glass or our carafes. We deal with mainly small producers that put their hearts into what they do and they wouldn't send us their wine if we weren't looking after it.

The proof is right here, so please feel free to ask your server to taste a couple of the wines and see for yourself the full flavoured, fresh wines we have available.

Sustainable (ST) - Farming practices that keep the vineyards healthy and productive long-term, minimising negative environmental impacts.

Natural (NL) - Wine that has little chemical and technological intervention, in either growth or winemaking stages.

Biodynamic (BD) - Wines made using the principles of biodynamic agriculture. Biodynamic refers to both the agricultural methods and the handling and processing of the fruit post-harvest.

Organic (OG) - Wines made from grapes grown in accordance with principles of organic farming, which typically excludes the use of artificial chemical fertilisers, pesticides, fungicides and herbicides.

Orange - White wines fermented in red wine fashion that pull enough pigment out of the skins to develop earthy colours, and the inevitable oxygenation adds to the orangeness. Wines made this way also tend to suffer no sulfur additions and skip filtration, so what ends up in your glass may be a tad cloudy, redolent of Sherry vapors.

Cellar wine

CHAMPAGNE & SPARKLING WINE
