WINE

Broadly speaking the wine world is divided into two main approaches, hands off or hands on, there is a time and place for both of them.

Hands off wine is a hail to “back to basics”, where the grower and wine maker have used minimal interventions during the process. Avoiding modern aids and technology, it yields a product that often varies between batches according to season, sunshine and the fruit. These wines may have unusual flavour profiles, textures and be cloudy in appearance. These wines are indicated with asterisks (*), please note the different categories below.

Hands on wine describes a process where growers and wine makers use contemporary techniques to achieve meticulous control and guide the product to a desired endpoint.

Sustainable

Farming practices that keep the vineyards healthy and productive long-term, minimising negative environmental impacts.

Natural

Wine that has little chemical and technological intervention, in either growth or winemaking stages.

Biodynamic

Wines made using the principles of biodynamic agriculture. Biodynamic refers to both the agricultural methods and the handling and processing of the fruit post-harvest.

Organic

Wines made from grapes grown in accordance with principles of organic farming, which typically excludes the use of artificial chemical fertilisers, pesticides, fungicides and herbicides.

Orange

White wines fermented in red wine fashion that pull enough pigment out of the skins to develop earthy colours, and the inevitable oxygenation adds to the orangeness. Wines made this way also tend to suffer no sulfur additions and skip filtration, so what ends up in your glass may be a tad cloudy, redolent of sherry vapors.

TAP WINE BY THE GLASS/CARAFE
