ABOUT OUR WINE

We're passionate about doing our part for the planet, which is why we've highlighted wines made from organically farmed grapes on our menu. This makes it easy for you to choose wines that align with your values and support producers who are committed to sustainable practices.

As for natural wine, the wines we've marked as such are made by the most dedicated producers who stick to traditional methods—no chemicals, no heavy machinery, and no modern interventions. These wines are often cloudy, spritzy, or lively, with flavour profiles that can be unexpected compared to modern wines. We love the raw beauty of this style, which is why we've included a few on the list for you to explore.

We're also committed to reducing our environmental impact, which is why we've embraced wine on tap. By using this system, we save thousands of bottles each month and cut down on the resources that go into their production, transport, and disposal. Plus, it's better for the wine! The wine is transported in bulk and kegged fresh, which means it's never exposed to oxygen until it reaches your glass. We work directly with producers who make wine specifically for our taps no compromise on quality!

AMBER

Although this may appear as a new type of wine to some of us, orange wines have been around since wine has. Calling them 'orange' is a relatively recent thing (2010 approx). These are wines made with green grape varieties that are left to macerate and ferment on skins much like how red wines are made.

plush fruit, tropical pineapple, acid driven, laced structure & tannin

2022 Sparrow + Vine, Semillon, Hunter Valley, NSW | 76 *

ROSÉ

Rosé wine bridges the gap between red and white, offering freshness with a hint of texture. Made from red grape varieties with brief skin contact, these wines range from pale and crisp to deeper, more savoury styles. Rosé is no longer just a summer favourite — it's a year round staple that pairs effortlessly with a wide range of dishes.
