## ABOUT OUR WINE

---

We're committed to supporting the planet, which is why we've highlighted wines made from organically farmed grapes on our menu. This makes it easy for you to choose wines that align with your values and support producers who share your commitment.

Alongside our selection of organic wines, we also offer selections from well-known producers hailing from classic wine regions that we all know and love. These familiar names and trusted vineyards ensure that every glass you sip is crafted with quality, delivering a satisfying and enjoyable experience with every sip.

## WINE ON TAP

---

We are always looking at ways to reduce our impact on the environment. Wine on tap and wine in lower impact vessels is something we've seen a resurgence of in the last few years. And we are here for it!

By using a tap system we save thousands of bottles per month! Not only the bottles themselves but also saving the energy and resources that go into their production, transport and disposal.

As for the wine, ask the experts, it's better for the wine. By transporting the wine in bulk containers, then transferring it into our stainless steel kegs, the wine sees no oxygen until it hits your glass or our carafes.

We work directly with producers that put their hearts into what they do and that make wine specifically for our taps. No compromise on quality whatsoever! The proof is right here, so feel free to ask your server for a taste!

---

So although this may appear as a new type of wine to you, orange wines have been around since wine has. Calling them 'orange' is a relatively recent thing (2010 approx). These are wines made with green grape varieties that are left to macerate and ferment on skins much like how red wines are made.
